Electrical World

A Review of Current Progress in Electricity
and Its Practical Applications

Volume LXXI

January 5 to June 29, 1918

McGRAW-HILL COMPANY, Inc.
Tenth Avenue and Thirty-sixth Street
NEW YORK CITY

INDEX TO VOLUME LXXI

January—June 1918

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest)

PAGES BY WEEKS

Jan.	5	1 to 80
Jan.	12	81 to 132
Jan.	19	133 to 184
Jan.	26	185 to 236
Feb.	2	237 to 288
Feb.	9	289 to 340
Feb.	16	341 to 392
Feb.	23	393 to 444
Mar.	2	445 to 496
Mar.	9	497 to 548
Mar.	16	549 to 600
Mar.	23	601 to 652
Mar.	30	653 to 704
Apr.	6	705 to 756
Apr.	13	757 to 808
Apr.	20	809 to 860
Apr.	27	861 to 912
May	4	913 to 964
May	11	965 to 1016
May	18	1017 to 1068
May	25	1069 to 1120
June	1	1121 to 1172
June	8	1173 to 1244
June	15	1245 to 1300
June	22	1301 to 1352
June	29	1353 to 1404

A

Accident prevention:
——Good lighting lessens accidents, 1194.
——Hints for line foremen in case of, 52.
——Preventing installation of wrong-sized fuses, *517.
——Safety bulletin box, *362.
——Utilities, co-operative insurance reduces accidents. By Chas. E. Morrison, *1082. Comment, 1069.
Accounting Section report. N. E. L. A., 1266.
Adirondack power consolidation plan, 62.
Advertising. (See Central station business and Displays.)
Agriculture:
——Electric farm appliance exhibit, 201.
Air compressor and grinder outfit. U. S. Air Compressor Co., 595, *802.
Air compressor, two-cylinder, motor-driven. Midvale Machine Works, *1166.
Air pressure outfit, automatic. M. L. Bastian Auto Engineering Works, *387.
Air station, motor-driven. Electric Appliance Co., 1115.
Air washers for turbo-generators, importance of. By L. H. Parker and J. J. Preble, *564; comment, 707.
Aircraft production. John D. Ryan appointed director, *1000.
Alloys:
——Acid proof (D.), 1328.
——High-resistance alloys, composition of. By M. A. Hunter (D), 628.
——Thermo-electromotive force of. By M. A. Hunter and J. W. Bacon (D.), 1329.
Alternating-current:
——Precise measurement of. By C. O. Gibbon, *979; comment, 967.
Alternators. (See under Generators.)
Aluminum:
——Conductivity of. By Guido Grassi (D), 56.
Aluminum: (Continued)
——In the electrical industry. By Jean Escard (D), 107.
——Processes for the manufacture of (D), 835.
——Production in Germany (D.), 1381.
Aluminum bronze, (D), 575; hardening of (D), 264.
American Association for the Advancement of Science, annual meeting, 61.
American Electrochemical Society, inspection tour through South, 942, *995.
American Gear Manufacturers' Association, annual meeting, 949.
American Institute of Electrical Engineers:
——Address of President Rice, 1374.
——Annual convention, 579, 1281, *1367, 1374.
——Chicago Section meeting, 269.
——Committee reports, 1375.
——Convention papers and discussions, *411.
——Edison medal to Col. J. J. Carty, *1097; comment, 1069.
——Emblem corona discharge, *978.
——Joint meeting with Association of Iron and Steel Electrical Engineers, 580.
——Lynn (Mass.) Section, address by E. W. Rice, Jr., 322.
——Members in uniformed war service, 785.
——Midwinter convention, 322, *411, 424.
——Nominations, 322, *629.
——President Rice's address, 424.
——Section meetings, 690.
——Service poster, *946.
——Single-phase induction motors discussed, 844.
——War's effect on cost and quality of service discussed, 165.
American Metric Association, annual meeting, 64.
American Society for Testing Materials, annual meeting 1327
American Society of Mechanical Engineers:
——Boiler code, 201.
——Convention, 1282.
——Spring meeting, 742, 1156.
American Telephone & Telegraph Company, annual report, 584.
American Washing Machine Manufacturers' Association, war service work, 268; annual meeting, 377.
Antennas. (See Radio.)
Arc:
——Circuit-breaker arc, effect of magnetic field on. By A. M. Holcomb, *1377.
——"Singing" arc, theory of the oscillations. By Lieut.-Col. J. B. Pomey (D), 1095.
——Suppression of arcs due to accidental ground. By M. H. Collbohm (D), 158.
Arc lamps:
——Testing under pressure (D), 262.
——With two pairs of carbons for networks with polyphase currents of low frequency (D.), 314.
Arkansas Association of Public Utility Operators, 1054, 1155.
Armature:
——Closed windings, rational theory of. By A. Iliovici (D), 209.
——Coil winding by blind workers, *114.
——Lead shaping tool. By Frank Huskinson, *1377.
——Magnetic pull on. By E. Rosenberg (D), 782.
——Winding, continuous-current, elementary principles of. By F. M. Denton (D.), 939, (D.) 1094, (D.) 1219, (D.) 1278.
Army cantonments. (See Cantonments.)
Army engineers, how to join, 668.
Army kitchen, electric, *662.
Associated Manufacturers of Electrical Supplies:
——Annual meeting, 525, 581, 632, *680.
——Board of governors meeting, 318.
——Heating and current-consuming devices section, 1049, 1154.
——International trade committee meeting, 475.
——Section meetings, 1154.
——Signaling Apparatus Section meeting, 790.
——Tariff committee progress, 265.
——War service committee's work, *46, *109, 164.
——Wire and Cable Section, war service, *892.
Association of Edison Illuminating Companies:
——President Junkersfeld resigns, 738.
Association of Iron and Steel Electrical Engineers:
——Committees' chairmen, 325.
——Joint meeting with A. I. E. E., 580.
Audion characteristic curves, effects produced upon by various kinds of signals. By A. D. Cole (D), 835.
Automobile:
——Air station, motor-driven. Electric Appliance Co., 1115.
——Gasoline sprayer, portable. Midvale Machine Works, *1238.
——Generators for charging storage batteries. Carleton Co., 1399.
——Headlamps, report on (D), 939.
——Light controller. American Sales Corp., 282.
——Lightning switch. Industrial Controller Co., *75.
——Primer, electrically heated. Master Primer Co., *75.
——Testing device. Jefferson Electric Mfg. Co., *74.
——Valve grinder. Stenman Electric Valve Co., Inc., 1399.
Automobile electric kitchen. By Anson S. Rice (D) 941.

B

Balancers. (See Motor Generators.)
Batteries:
——Carbon, catalytic action of (D.), 1329.
——Charging equipment of Southern Pacific (D), 940.
——Charging, methods and plant for. By F. Ayton (D), 940.
——Charging outfit. Hobart Brothers Company, *698; Emerson Electric Mfg. Co., *1010; Stahl Rectifier Co., *1167.
——Dry cells and wet batteries. By Wm. J. Heedman (D.), 678.
——Storage-battery capacities, calculation of. By C. W. Hazelett (D.), 990.
——Storage battery earnings, 897.
——Storage-battery industry. By L. Jumeau (D), 1096.
——Bell chime, motor-operated at Boston store. *1384.
Blind workers winding armature coils, *114.
Blowers:
——Disk fan. Bicalky Fan Co., *594.
——Fan engine mounting, 52.
——Louvers for ventilating fans. Batterman Truitt Co., *230.
——Motors for. By C. E. Clewell, *196; comment, 610.
——Propeller fan pulley-driven. Batterman Truitt Co., 179.
Boiler house practice, improvement in.....1038
Boiler room:
——Ash-handling system, points on purchasing. By Herbert E. Birch (D), 421.
——Boiler and furnace equipment, New Bedford (Mass.) company I, *398; comment, 394; II, *771; comment, 758.
——Boiler room data, Joliet Station, 194.
——Boiler maintenance, reducing costs of. By S. B. Applebaum, *349; comment, 341.
——Columbus (Ohio) plant equipment, *450; comment, 447.
——Economies, 636.
——Economy increased by use of fuel oil, *711.
——Feed-water regulators, automatic, as an investment. By M. A. Saller (D), 783.
——Firing high-grade coal during peak load to increase boiler capacity, 935.
——Furnace walls, building and care of. By L. Conge (D), 471.
——Handling coal and ashes with a single hoist, *518.
——Heat insulation to save coal. By Austen Bolam, *554.
——Indicator, CO_2. Dwight Mfg. Co., *542.
——Measuring equipment, 933.
——Monorail hoist for handling ashes. Link-Belt Co., *283.
——Operating furnace while mending stoker, *620.

*Indicates illustrated articles.

Boilers:
——A. S. M. E. code, 201; revision (D), 784.
——Asbestos insulation, advantages of, 1275.
——Burning dust-bearing coal efficiently. By L. A. Stenger, *1080; comment, 1302.
——Coal waste preventable. By G. W. Partridge, *577.
——Corrosion, prevention of. By Ch. Chorower (D.), 1046.
——Emergency temporary repair, 726.
——Evaporation, new method of increasing. By Carl Hering (D.), 107.
——Feed water:
Data for analyzing. By T. W. Reynolds, 257.
For steam boilers. By J. A. Montpelier (D.), 1278.
Joliet plant system, *193; comment, 185.
Method of weighing. By T. W. Reynolds, *310.
Purification of. By W. T. Read (D.), 1279.
Samples. By T. W. Reynolds, 99.
Softening systems. By S. B. Applebaum, 349; comment, 341.
——Fuel bed of uniform thickness essential for economy, 518.
——Furnace arch:
Effect on smoke abatement (D.), 159.
Hight-set. Green Engineering Co., *1010.
——Furnace explosion, prevention of. By Gilbert Rutherford, 100, 309.
——Furnaces, design of and combustion of coal. By Henry Kreisinger, C. E. Augustine and F. K. Ovitz (D.), 626.
——Furnaces, regulating combustion in. By L. Conger (D.), 1380.
——Gas firing of. By T. M. Hunter (D.), 105.
——Gas for fuel, efficient use of, 1142.
——Grates, emergency temporary repair for, 568.
——Operating broken chain grate in emergency, 466.
——Powdered coal, results from. By A. E. Macinnis, *1032; comment, 1018.
——Radiant heat and fire-box design. By James T. Anthony (D.), 1146.
——Settings, asbestos covering for, 1309.
——Smoke breeching, expansion joint for. By T. W. Reynolds, *570.
——Soot blowers, mechanical, effect 15 per cent coal reduction, 154.
——Soot formation, loss from and prevention, *1203.
——Stokers:
Mechanically operated. By M. Lamotte (D.), 55.
Selection of. By Joseph Worker (D.), 887.
Underfeed type, efficient combustion of. bituminous coal with. By Russel C. Hine (D.), 1328.
——Tubes, rusting and prevention. By Bruno Zschokke (D.), 835.
Bonus system for power-plant employees. By Warren B. Lewis (D.), 941.
Book reviews:
——Business Law for Engineers. By C. Frank Allen, 151.
——Electric Vehicle Handbook. By Frank W. Smith and H. C. Cushing, Jr., 50.
——Empirical Formulas. By Theodore R. Running (D.), 211.
——Employment Department and Employee Relations. By F. C. Henderschott, 1273.
——Engineering Mathematics, *1087.
——Everyman's Chemistry. By Ellwood Hendrick, 316.
——Finding and Stopping Waste in Modern Boiler Rooms. By the engineers of the Harrison Safety Boiler Works, 1087.
——How to Make High-Pressure Transformers. By Prof. F. E. Austin, 151.
——Industrial Research in the United States. By A. P. M. Fleming (D.), 991.
——Lighting Art. By M. Luckiesh, 872.
——Mystery of Matter and Energy. By Dr. Albert C. Crehore, 50.
——Petroleum and Natural-Gas Register, 991.
——Practical Electrical Illumination. By Terrell Croft, 316.
——Radio Communication, Theory and Methods, with an Appendix on Transmission Over Wires. By John Mills, 991.
——Theory of Submarine Telegraph and Telephone Cable. By H. W. Malcolm, 50.
Booster station in plant of power customer, 273.
Boston:
——Edison Electric Illuminating Company:
Arsenal service contract, 1091.
Charge for broken lamps replaced, 1093.
Effect of fuel order on, 162.
Interconnection plan, benefits from, *1191.
Seeks postponement of rate case until end of war, 1053.
Underground laterals installed for immediate service only, 52.
——Street-lighting rates reduced, 532.
——Third Liberty loan parade, 737.
Brakes, magnetic, Westinghouse, *127.
Brass melting, electric, present status of. By H. M. St. John, 1043; I, 1129; II, 1216.
Brazing torch, electric-gas, Tyler Mfg. Co., *1348.
Bucket, clamshell type, motor-operated. Hayward Co., *283; Blaw-Knox Co., 1010.
Bureau of Standards:
——Relation to illuminating engineering, 824.
Busbars:
——Copper busbars, current capacity of. By F. M. Billhimer (D.), 627.
——Mounting for transformer buses, *983.
——Single-bus system that serves purpose of double bus, *984.
——Supports with adjustable base. Lewis & Roth Co., *855.
Bushings, cabinet, that snap into place. J. J. Duck, 1063.
Business conditions. (See Foreign trade, Statistics and Trade conditions.)

C

Cable end-bell flange type. Electrical Engineers' Equipment Co., *854.
Cables. (See Wires, wiring and conduit.)
California:
——Construction to get gas fuel, 585.
——Co-operation of electrical men, 679.
——Interconnected systems. By J. P. Jollyman, *1020; comment, 1017.
——Interconnection of transmission systems, 218, 374.
——Los Angeles aqueduct power to save oil consumption, 527.
——Pooling to relieve power shortage, 1281.
——Power contract between Pasadena and Southern California Edison Co., 946.
——Power resources in Southern California. By H. A. Barre (D.), 939.
——Water-power development a necessity. By John A. Britton, *15.
California Association of Electrical Contractors and Dealers' meetings, 1039.
Canada:
——Availability of energy for heat and power. By John Blizzard (D.), 834.
——Electric power conditions, 1386.
——Fuel consumption, reduction of. By J. M. Robertson (D.), 939.
——Montreal tramways, power distribution for (D.), 678.
——Pumping stations. By G. Kuhne (D.), 939.
——Southern Canada Power Co., growth of (D.), 677.
——Water powers and their relation to the fuel situation. By J. B. Challies (D.), 988.
——Workless day order, 319.
Canadian Electrical Association, annual meeting, 1386.
Car-loading machine, Link-Belt Co., *178.
Carbon, amorphous, structure of under X-ray examination (D.), 106.
Carbon cell, experimental. By S. Albert Reed (D.), 990.
Cargo winches, electric. By E. F. Whitney (D.), 367, (D.), 678.
Catalog sizes and paper standardization, conference, 1288.
Cells, standard, substitutes for, 412.
Central stations. (See also Hydroelectric developments, Transmission systems.)
——Alabama Power Co. Warrior River Steam Plant. By W. B. West (D.), 886.
——Attleboro (Mass.) substation supersedes steam plant, *1187.
——Buenos Aires:
Power supply in (D.), 1045.
Tres Sargentos substation (D.), 940.
——Bulk-supply generating station at coal mine, *292; comment, 291, *344; comment, 341.
——Central Illinois Public Service Co. line-synchronizing stations of, *305; comment, 290.
——Chile Exploration Co. power house (D.), 314.
——Cincinnati (Ohio) Union Gas & Elec. Co., West End Power Station (D.), 989.
——Columbus (Ohio) Ry., Power & Light Co. new generating station, *450; comment, 447.
——Commonwealth Edison Co. Northwest generating station, *928; comment, 914, *975.
——Connecting two dissimilar systems at Memphis, Tenn., 934.
——Construction cost of medium-size station, 830.
——Dominion Power & Transmission Co., Ltd., steam plant at Hamilton, Ont., *818; comment, 809.
——Georgia Railway & Power Co.:
Adapting existing lines to increased load. By E. B. Hook, Jr., *39.
——Germany:
Hanover steam station (D.), 159.
Interconnection of generating stations, 110.
Long-distance transmission plans. By F. Neithammer (D.), 55, (D.), 626.
——Great Britain:
Electric power supply. By Leon Gaster (D.), *782.
England, power supply (D.), 677, (D.), 731; comment, 238.
Interconnection, in the west of Scotland (D.), 677.
——Hamilton (Ont.) steam plant, *818; comment, 809.
——In Japan, status of, 872.
——Interconnection. (See under Transmission systems.)
——Joliet (Ill.) plant, *146, *193; comment, 185, *242.
——Kansas City Light & Power Co. new plant, *321.
——Massachusetts systems, interconnection of, *448.
——Minneapolis General Electric Co. substation, *891.
——Narragansett Electric Lighting Co. 45,000-kw. turbine, *317.
——New Bedford (Mass.) Gas & Edison Light Co. new station I, *396; comment, 394; II, *771; comment, 758.
——New York & Queens Electric Light & Power Co., change-over from two-phase to three-phase. By H. C. Dean, *1034; comment, 1018.
——Philadelphia Electric Co. Chester station, *1223.
——Public Service Company of Northern Illinois, Joliet plant, *146, *193; comment, 185, 242.
——Puget Sound Traction, Light & Power Co. White River development. By F. Schmidt (D.), 731.
——Rand Power Companies, South Africa, system. By Bernhard Price (D.), 885.
——Rochester (N. Y.) Ry. & Light Co. new station. By P. B. Findley (D.), 886.
——San Joaquin Light & Power Corp. outdoor substation at Madera. By L. J. Moore, *718; comment, 707.
——Small plant interconnection, benefits from, 449.
——South Africa, Rand Power Companies, system. By Bernhard Price (D.), 885.
——Southern California Edison Co., physical data of. By H. A. Barre (D.), 886.
——Southern Canada Power Co., growth of (D.), 677.
——Tri-City Company, Moline plant, *1023.
——Turners Falls (Mass.) steam relay plant and hydroelectric development, *931.
——Washington (D. C.) utilities, war expansion of, *1179.
——Windsor (W. Va.) plant, American Gas & Electric Co., and West Penn Power Co., *292; comment, 291, *344; comment, 341.
Central station business and sales management:
——Analysis of income, method employed by Rochester company, *261.
——Appliance business:
Increases as servants take up factory work, 882.
Payments method of handling with regular meter service bill, 571.
Repair frauds, scheme for preventing, 467.
Sales pushed by New Orleans company, 938.
To offset daylight-saving loss, 1144.
——Arsenal service contract, 1091.
——Bill delivery, war-time methods, 562.
——Bill form which aids in collections and bookkeeping, *781.
——Billing by machine makes large saving, *259.
——Billing expense reduced by use of rubber stamps, *572.
——Brass melting load. By H. M. St. John. I, 1129; II, 1216.
——Cartoon helps complaint department, *520.
——"Cash-and-carry" plan applied to light bills, *520.
——Changing a power contract to obtain greater profit, 985.
——Classification of kilowatt-hour sales, Rochester Co., 207.
——Classifying customers, comment, 1122.
——Collecting statistics from customers' account. By G. R. Kenny, 774.
——Collection method, Indiana Ry. & Light Co., *833.
——Combination gas and electric billing, *468.
——Commercial Section report, N. E. L. A. *1265.
——Comparing gas and electric service, 884.
——Contract for electric service for workmen's houses, 1092.
——Credit and collection prospects for 1918. By M. A. Curran, 97.
——Credit department's relations with customers, 53, 623.
——Customer's accounts, reducing expense of handling, 730.
——Customers' deposits, objections to enforcing rigidly, 729.
——Customers grouped according to rate schedule, 1277.
——Daylight saving effect on residential lighting, *833.
——Delinquent accounts reduced by 80 per cent, *937.
——Doherty power men sell small appliances, 154.
——Domestic appliance sales, increase in, 208.

*Indicates illustrated articles.

Central station business and sales management: (Continued)
——Electric appliance market, trend of, 208.
——Electrochemical loads, possibilities, 521.
——Energy consumption of small power customers, *1379.
——Energy earnings and output, October, 1917. *26; November, *254; December, *463; January, *725; February, *932; March, *1139.
——Fixture campaign, bonus and penalty system for salesmen, 312.
——Flatirons loaned to conserve coal, 312.
——Flat-rate service stopped to prevent energy waste, Worcester Electric Light Co., *884.
——Fuel conservation in hydroelectric territory, *156.
——Gratuitous repairs and deliveries curtailed by Commonwealth Edison Co., 312.
——Guarantee deposits, temporary receipts for, *573.
——House-wiring campaign, some indirect benefits, 779.
——House-wiring contracts, granting credit upon, 730.
——Hydroelectric company advertises fuel saving, *625.
——Illumination demonstration room, 156.
——Lighting curtailment, economics, 1265.
——Line extension, income of 50 per cent of cost required by Pacific Power & Light Co., 311.
——Load factor basis for purchasing electricity, *1378.
——Load, relation of to coal situation. By J. R. Cravath, 1359; comment, 1354.
——Lobby of central station building designed to attract customers, *102.
——Maximum demand, factors affecting determination of. By Chester I. Hall (D.), 575.
——Minneapolis General Electric Co. new headquarters designed to attract customers, *102.
——Motor and wiring order credits, method of handling, 937.
——Motor stock an asset in securing power business, 157.
——New-business department:
Changes in methods brought about by war, 1214.
Curtailment policy, 155.
Of Public Service Co. of Northern Illinois, 676.
Outlook for 1918, 259.
Program planned to increase future business, 103.
Trade acceptance helps, 1379.
——Off-peak service. By J. R. Cravath, 1360; comment, 1354.
——Output of large generating systems in U. S. and Canada, 618; comment, 601.
——Past-due accounts, methods to collect, 53.
——Peak equalization, 1265.
——Power bill paid by sale of wood waste, 208.
——Power contracts, legal status of, 1044.
——Power salesmen's opportunity for developing appliance load. By H. V. Coffy, 313
——Pumping installation, points to consider, 521.
——Raising rates to meet higher costs. Minn. Gas & Elec Co., 844.
——Range business growing in small cities, 571.
——Range policy affected by power shortage, 882.
——Range sales situation, 1918 outlook, 519.
——Range sales, ten vital points for. By F. J. Allen, 1327.
——Rate advance announcement, 467.
——Rates for electrical energy based on individual power factors. By P. Boucherot (D.), 523.
——Residences and commercial lighting customers' consumption analyses of, *1326.
——Return post cards which get away from stereotyped phraseology, *675.
——Rural service in Wisconsin, data on, *985.
——Sales bulletin for employees, *625.
——Sales department expense, classification of, 1325.
——Sales departments relations with customers, 311.
——Selling field, war's influence on, 1214.
——Service and meter record cards of Beloit (Kan.) utility, *938.
——Service bill with advertising and discount coupons, *936.
——Service, study and analyze cost of. By Gerard Swope, 838.
——Small power business, development of, 155.
——Standardizing the 50-watt tungsten in New Orleans, 1091.
——Steam and electric production costs. By J. A. McHollan, *513.
——Stickers to help collections, *832.
——Summer load, economic aspects of, I, *1084; II, *1134; comment, 1123.
——Thawing frozen pipes, rates for, 363, 467.
——Transformer sizes, salesman's assistance in selection of. By A. G. Drury, 1276.
——"War load," analysis of, 1212.
——War service, 1212.

Central station management:
——Amherst (Mass.) substation sold with provisions protecting stockholders' interests, 971.
——Appliance load, effect of on outlying residential districts, 1379.

Central station management: (Continued)
——Appliance sales commission fund for the salespeople, 967.
——Coal conditions, *136, *188, *214, *240, *266.
——Continuous meter-reading a war-measure plan of Beverly (Mass.) company, 676.
——Delayed meter readings by post card, *1327.
——Educating women in central-station work, 623.
——Employee loan fund, 1325.
——Employee relations. Frank A. Farnsworth, Jr., *1199.
——England, central-station conditions and restrictions, 1177.
——Girl meter readers satisfactory at Pueblo, Col., *572.
——Honor roll for uninterrupted service by Doherty company, 259.
——In league with government, *1186.
——Load readjustment, power customers cooperate, 312.
——Meter accuracy of one company affects another, 1044.
——Meter reading and delivery of bills by high school students, 313.

——Long-distance transmission plans. By F. Niethammer (D.), 55, (D.), 626.
——Substitutes in electrical industry (D.), 1219.
Glasses for protecting eyes from injurious radiations. By W. W. Coblentz and W. B. Emerson (D.), 1146.
Government service:
——Army engineers, how to join, 668.
——Engineers in, *20, 378.
——Thirty-seventh U. S. Engineers, *720.
——Technical men needed, 1180.
——Wages to electrical men, 869.
Graphite and amorphous carbon, structure of under X-ray examination (D.), 106.
Grates. (See Boilers.)
Gravitational factor. By Sanford A. Moss (D.) 990.
Gravitational repulsion. By Francis E. Nipher (D.), 471.
Great Britain:
——Coal conservation committee report (D.), 264, (D.), 1094.
——Electric power supply. By Leon Gaster (D.), *782; (D.), 1278.
——England:
Central station conditions and restrictions, 1177.
Electric power supply (D.), 677; (D.), 731; comment, 238; (D.), 1094.
Engineering progress, 840.
Intensive developments of electric power after the war (D.), 106.
Keadby railway and bridge signaling and interlocking of. By Jas. Benj. Ball (D.), 835.
Lighting control by Ministry of Munitions (D.), 209.
Restrictions on electrical purchases, 1187.
Transmission and distribution conditions, plans for improvement (D.), 885.
——Scotland, west, interconnection of transmission systems (D.), 677.
——Water power in British Isles. By Alexander Newlands (D.), 887.
Grinder, electric, for laboratory use. Robbins & Myers Co., 1348.
Ground resistance, reliability of methods of testing, 621.
Grounding practice, prevailing trend in, 829.
Grounding to water mains, inexpensive method of, 1322.
Guy anchor, cone-shaped. By M. N. Longbothum, *518.
Guy-rod head, weldless. Diamond Expansion Bolt Co., *802.
Guys, proper installation of strain insulators, *416.

H

Halifax power cable, underwater section survives explosion, 169.
Hammer, motor-driven. United Hammer Co., 1114.
Hand and face drying machine. Groton Electrical Devices Co., 959.
Harmonics in symmetrical M-phase systems. By V. Karapetoff, 660.
Heat regulator, Western Electric, *283.
Heat transmission of building materials. By A. C. Willard and L. C. Lichty (D.), 1220.
Heaters, electric:
——Air heaters, Cutler Hammer Mfg. Co., *386.
——Faucet, electrically heated. Electrical Products Corp., *1346.
——Footwarmer for outdoor service. Westinghouse, *231.
——Radiator, combination steam and electric. Electro Steam Radiator Co., 1398.
——Warming pad, small. Westinghouse, 802.
Heating pad, electric. Wirt Co., 594.
Heating, electric:
——Feasible at $12 per hp. By P. H. Mitchell (D.), 941.
——Industrial. By E. A. Holloway, J. B. Black and E. B. Walthall (D.), 990.
——Industrial, low-temperature. By Dwight D. Miller (D.), 941, (D.) 1147.
Heating, steam:
——Central heating plant. By F. G. Clark (D.), 1147.
Heaviside, Oliver, made A. I. E. E. honorary member, 943; comment, 913.
Hoists, electric:
——Monorail hoist for handling ashes. Link-Belt Co., *283.
House-wiring campaigns. (See under Central Station business and "Wire-Your-Home-Time.")
Hydroelectric developments. (See also Water Power.)
——Aluminum Company of America, Cheoah, Tenn., *1049.

——Philadelphia, Independence Square. By E. F. Kingsbury (D.), 209.
——To stimulate plant growth and friction. By J. L. R. Hayden and C. P. Steinmetz (D.), 574.
Incandescent lamp fixtures. See Fixtures, Incandescent lamps.)
Incandescent lamps. (See Lamps, incandescent.)
Income tax reports, 145.
Inductance:
——Repulsion and mutual, of reactance coils with same axis. By H. B. Dwight (D.), 1380.
——Self and mutual, measurements of. By Fred E. Pinchot (D.), 56.
Inductive interference, exposed line system, remedy for, 1373.
Inductometer, variable mutual type. Leeds & Northrup Co., *854.
Industrial applications:
——Beet-sugar factories, advantages of electrification. By E. M. Ellis (D.), 575.
——By-product coke plant, power plant for. By Geo. B. Evans (D.), 210.
——Calendars, electrical control for. G. E. Co., 491.
——Cranes, motors and control for. By C. E. Clewell, *148; comment, 134.
——Fan blower and air-compressor applications. By C. E. Clewell, *196; comment, 610.
——Flywheels in motor operations. By C. E. Clewell, *400.
——Flywheels in woodworking, value of. By David R. Shearer, *968; comment, 965.

*Indicates illustrated articles.

Industrial applications: (Continued)
——Graphic meters to facilitate machine-tool operations. By C. E. Clewell, *454; comment, 446.
——Grinder regulator for pulp mills, G. E. Co., *543.
——Interpole mill motors vs. non-interpole. By W. R. Runner, *302.
——Machine for standardizing print-shop composing room operations, motor-driven. J. E. Richards Co., 542.
——Machine grouping and power requirements in large shops, 310.
——Machinery for handling of materials, electric equipment of (D.), 211.
——Motor control eliminates fuel waste in sugar mill, *673.
——Motor-drive, standardizing, increased production and economies effected (D.), 885.
——Planers, motor-driven. By C. E. Clewell, *87; comment, 82.
——Power requirements in large shops, 310.
——Shipbuilding plant, motor drive for. By David Elwell, *506; comment 498.
——Shoe factory, improved motor-drive, *303.
——Silk industry, electricity in. By Ch. Vallet (D.), 989.
——Steel plant applications. By F. B. Crosby (D.), 1046.
——Steel rolling mills:
Auxiliary motors, selection of. By J. D. Wright, 580; (D.), 627.
Electric drive for. By L. Rothera (D.), 575.
Motor applications. By C. E. Clewell, *250; comment, 239.
Motors, capacity of, 580.
Motors, standardization of, 580.
Production increased by replacing steam engine, *99.
Reversing mill (D.), 989.
——Sugar mill, electric drive and control for, *673.
——Synchronous motors, efficiency in industrial work. By Will Brown, *604; comment, 602.
——Textile industry, motors for. By C. E. Clewell, *354; comment, 343.
——Woodworking drive problems solved. By W. A. Black, *821; comment, 809.
——Woodworking, value of flywheels in. By David R. Shearer, *968; comment, 965.
Industrial housing requirements, electrical energy for, 1276.
Industrial lighting. (Lighting, industrial.)
Industrial plants:
——Automobile tire factory, load characteristics of, *157.
——Bakery, motor drive in (D.), 1219.
——Central station service, advantages of. By W. S. Buchanan (D.), 1094.
——Distributing systems, flexible. By Bassett Jones (D.), 677; (D.), 1095.
——In Switzerland, electrical heating of. By F. Rutgers (D.), 106.
——Lighting units for. By Davis H. Tuck, 195.
——Logging and saw mills, electricity in. By E. H. Horstkotte (D.), 678.
——Motor data sheet for, *568.
——New Jersey plants, power shortage, 164.
——Quaker Oats Company, *1103.
——Shoe factory, improved motor drive for, *303.
——Steel works, labor-aiding appliances in. By S. Wellman (D.), 783.
——Sugar mills, economy of electric drive. By C. A. Kelsey (D.), 939.
——Tamarack mills power plant. By Charles H. Bromley (D.), 886.
——Westinghouse plant at So. Philadelphia, *816.
——White's South African Cement Co., Ltd. By A. Campbell (D.), 887.
——Woodworking plant, electric drive problems solved. By W. A. Black, *821; comment, 809.
Industrial preparedness. (See Preparedness.)
Industrial specialization of engineers. By E. Piernet (D.), 159.
Instruments:

R

Rack, automatic, for soldering iron. Cutler-Hammer Mfg. Co., *1398.
Radio:
——Audion characteristic curves, effects produced upon by various kinds of signals. By A. D. Cole (D.), 835.
——Audion, comparative experiments on. By G. Valauri (D.), 421.
——Calibrating a wavemeter (D.), 159.
——Continuous waves, production of by spark discharger (D.), 678.
——High-voltage condenser for transmitters (D.), 835.
Radio: (Continued)
——Inclosed arc with novel characteristics (D), 887.
——Inductive interference. By Lieut. Ellery W. Stone (D.), 835.
——Open-circuit oscillators as receivers (D.), 678.
——Radio communication, technical problems of. By Léon Bouthillon (D.), 941.
——Radio-telephony, stray interference in. By Alfred N. Goldsmith (D.), 732; (D.), *784.
——Radioscopic method in the treatment of wounded (D.), 1046.
——Receiver for undamped oscillations (D.), 784.
——Wartime wireless instruction. By E. E. Bucher (D.), 784.
——Wireless station at Karlsborg, Sweden (D.), 887.
Railways:
——Berlin railways, new type of power transmission (D.), 834.
——Coire-Arosa Railway (D.), 469.
——Electrification to increase transportation capacity. By F. H. Shepard (D.), 158.
——Fuel saving through operating economies (D.), 469.
——Gearless locomotives for the St. Paul road. By A. H. Armstrong (D.), 835.
——In Italy (D.), 55.
——Iron-transmission wires for, a.c. railroads. By W. Kummer (D.), *420.
——Italian railways, electrification of. By A. Barbagelata (D.), 263.
——Loetschberg (Switzerland) Railway (D.), 1380.
——Melbourne, Brunswick and Coburg Tramways new cars for. By Struan Robertson (D.), 105.
——Montreal tramways, power distribution for (D.), 678.
——Niagara Falls-Buffalo line (D.), 886.
——Paris railway substation (D.), 1046.
——Power saving campaign, Connecticut Company (D.), 627.
——Rolling stock in the United States. By J. Charlier (D.), 989.
——St. Paul Ry., locomotives for. By F. H. Shepard (D.), 886.
——Signaling and control on. By C. M. Jacobs (D.), 376; (D.), 677.
——Six-motor multiple-unit trains for Montreal (D.), 627.
——Storage battery cars on Italian railways. By Francesco Rossi (D.), 470.
——Traction motors, heating of the armature in. By Leonhard Adler (D.), 158.
——Tramways' service in Halifax disaster (D.), 55.
——Ventilated motors during severe winter. By R. E. Hellmund (D.), 731.
——Voltage regulator and phase-balancer regulator equipment of Phila. Electric Co. By R. M. Carothers (D.), 627.
——Voltage rises in third-rail circuits. By D. D. Ewing (D.), 55.
Ranges, electric. (See Stoves, electric.)
Rates. (See also Regulation of public utilities.)
——Boston Edison company seeks postponement of rate case until end of war, 1053, 1332.
——Boston street-lighting rates reduced, 532.
——California, higher rates needed, 791.
——Cincinnati rate case, 1002.
——Cleveland, Ohio, rate case, 113.
——Columbus, Ohio, rate case, 1106.
——Commodity prices and utility rates. By Wm. J. Hagenah, *1024.
——Community rate, finding best character of. By Bert H. Peck, 825.
——Daylight saving may lead to higher rates, 733.
——East St. Louis (Ills.) Light & Power Co. allowed higher rates to increase emergency, 376.
——Flat-rate service stopped, Worcester Elec. Light Co., *884.
——For electrical energy based on individual power factors. By P. Boucherot (D.), 523.
——For off-peak load. By J. R. Cravath, 1359; comment, 1354.
——For thawing frozen water pipes, 363, 467, 571.
——German central-station rates, 462.
——Higher rates will keep utilities strong, 895; comment, 861.
——Illinois rate increases, 742, 1338.
——Increase justified in the language of labor, 675.
——Increases, action taken by commissions on, 1189, 1356.
——Increases to follow high cost of coal, *240.
——Indianapolis companies ask for more relief, 1223, 1334.
——Insull, Samuel, on rate situation, 1257.
——Kansas City Light & Power Co. increase, 1054, *1226.
——Middle West Utilities Company anticipates increase, 1284.
——Minnesota Gas & Elec. Co. raising rates to meet higher costs, 844.
——New York Edison rates to hold, 1223.
——Philadelphia Electric Co. increase, 1338.
——Power contracts, legal status of, 1044.
——Providence (R. I.) increase, 270.
——Reading, Pa., increase in coal clause, 110.
——Regulation by commissions, 895.
Rates: (Continued)
——San Bernardino (Calif.) change sanctioned, 1230.
——Sayre (Pa.) Electric Co. increased rate schedule filed, 375.
——Service charge rate in New York State, 792.
——Sheboygan, Wisc., increase, 319.
——Valuation rate cases, making three estimates in, 92.
——Wisconsin rate relief, 950, 1002.
Reactance coils with same axis, repulsion and mutual inductance of. By H. B. Dwight, 1380.
Reactance of alternators and its applications, 1373.
Reactances in multiple, graphical representation of. By H. C. Stanley (D.), 367.
Reactors:
——Current-limiting reactances (D.), 1147.
——Installation and care of. By M. E. Skinner, *924; comment, 915.
——Reactance coils, long, self-inductance of. By H. D. Dwight, *300; comment, 290; By H. E. Weightman, 1330.
——Reactance coils, short, self-inductance of. By H. B. Dwight, *1078; comment, 1070.
Readjustment and reconstruction commission. By Wingrove Bathon, I, 1124; II, 1272; III, 1310; plan under way, 1336.
Rectification of high voltage alternating current by the corona (D.), 1278.
Rectifier magnetic for charging storage batteries. France Mfg. Co., *1347.
Rectifiers, mercury-vapor:
——Electrode, luminosity of. By Harvey B. Lemon (D.), 471.
——Performance as affected by wave form and frequency. By Dr. William Tschudy, *403; comment, 395.
Red Cross bandage output increased by electricity, *1185.
Refractory for baffles, plastic. Betson Plastic Fire Brick Co., 594.
Refrigerating machinery, portable, for theater skating scene, *91.
Regulation of public utilities. (See also Rates.)
——California Commission:
Bond sale authorized, 1106.
Pooling of power to relieve shortage, 1281.
Priority list for power consumers, 1331; comment, 1301.
Utility financing in war emergency, 371.
War power problems, 998.
War-time problems, 635.
——Colorado Commission stops competitive plant construction, 275.
——Constructive regulation urged by Empire State Gas & Electric Association, 376.
——Constructive spirit of the commissions. By William J. Hagenah, 24.
——Credit of utilities. By Herbert A. Wagner, *916; comment, 913.
——Duty of commissions. By Max Thelen, 635.
——Illinois Commission:
Allow higher rates to relieve emergency, 376.
Community rate, finding best character of. By Bert H. Peck, 825.
Contracts in Illinois, 897.
Credits and deposits, 376.
Free extensions suspended, 740.
Priority order on power, 1153.
Rate increase cases, 423, 742, 1338.
Rate-making practices, 1230.
War conditions and rate of return, 1156.
——Indiana Commission:
Indianapolis companies ask more rate relief, 1222, 1334.
——Massachusetts Commission:
Boston Edison company asks postponement of rate case until after war, 1053, 1332.
Interconnection order sought as war measure, 112.
——New Jersey Commission:
On rate increase, 918.
Public Service Electric Co. coal shortage hearing, *478.
Rate increase authorized, 530.
——New York Commission, First District:
Property values under war conditions, 638.
——New York Commission, Second District:
Coal saving committee, 636.
Holding company denied control, 482.
——Ohio Commission:
Cleveland rate case, 113.
Utility merger authorized, 585.
——Rates, action taken by commissions, 1189, 1356.
——Rate regulation, 895; comment, 861.
——Rate revision, how to handle an appeal for. By Harold L. Geisse, 923.
——Scope of commission. By Harold L. Geisse, 923.
——Test of regulation. By William J. Hagenah, 24.
——Washington (D. C.) telephone case brings up public ownership, 474.
——Wisconsin Commission on rate relief, 950, 1002.
Regulators:
——Fuel-oil regulator, *204.

*Indicates illustrated articles.

Relays:
——For current balance protection, 1371
——Inclosed overload safety type. Westinghouse, *1238.
——Mine installations. By C. J. Monk (D.), 263.
——Overload type. Monitor Controller Co., *1166.
——Reverse-current type for circuit breakers. Automatic Reclosing Circuit Breaker Co., *698.
——Reverse phase type. Phila. Electric Co., *439.
Research, scientific and industrial:
——British practice in research, features of, 368.
——Broader aspects of, comment, 445.
——Co-operative research by wire and cable makers, 576.
——Department conducted by Prof. Vladimir Karapetoff:
Investigations planned or under way, 160, 368, 576, 836, 1047, 1280.
——New physics and chemistry laboratory in Japan, 576.
Resistance:
——Discharge resistance, calculation of. By Paul Girault (D.), 522.
——For starters and controllers (D.), 990.
——In parallel, determined graphically. By A. S. L. Barnes, *1323.
——Of parallel conductors, chart for calculating. By A. Caster (D.), 941.
——Westinghouse research building and equipment, *1132.
Resistance, electrical, of the human body (D.), 211.
Resistances and reactances in multiple, graphical representation of. By H. C. Stanley (D.), 367.
Resuscitation from Shock Commission report, N. E. L. A., 1252.
Rheostats:
——Compression type. By Arthur H. Allen (D.), 989.
——Field rheostat, three-point mounting of, *726.
——For motion-picture projection. Ward Leonard Co., *1346.
——Inclosed type for garages. Ward Leonard Electric Co., *1328.
——Starting rheostats, calculation of energy absorbed by. By J. Saint-Germain (D.), 367.
Rio de Janeiro, electric buses for. By George Drake Smith, *1140.
Roentgen-rays:
——Determination of atomic weights by means of X-rays. By C. W. Kanoit (D.), 316.
——Fluorometric apparatus for regulating. By H. Guilleminot (D.), 315.
——Hot-cathode Roentgen-ray tube, new radiator type. By W. D. Coolidge (D.), 263.
——Portable generating outfit. By W. D. Coolidge and C. N. Moore (D.), 315.
——Radiation from systems of electrons. By Sir J. J. Thomson (D.), 1147.
——Total emission of X-rays from certain metals. By C. S. Brainin (D.), 106.
——X-ray station mounted on automobile, 1115.
Rotary converter:
——Armature reaction in. By G. Badey (D.), 522.
——Operation of. By W. R. Bowker (D.), 886.
——Self-starting two and three-phase types (D.), 885.
——Starting when connected to transformer secondaries. By F. D. Newbury and M. W. Smith (D.), 158.
Rotors:
——Design and specification. By S. F. Barclay (D.), 885.
Rubbing machine, motor driven. Mattison Machine Works, *959.
Russia:
——Water-power legislation (D.), 939.

S

Safety. (See accident prevention.)
St. Louis:
——Bevo Building, electrification of, 978.
——United Electric Light Co.:
Educational publicity on fuel conservation, *207.
Emergency medical calls, 1277.
Equips own coal mine, 1022.
Special taxes, 1144.
Salaries:
——Higher salaries for engineers needs, comment, 549.
Sander, motor-driven. Electric Specialty Co., *439.
Searchlamps, development of. By Louis J. Auerbacher, *1319.
Searchlight, portable, for emergency work. Portable Searchlight Co., *1347.
Searchlight regiment organized, *168.
Sewing machine, portable, electric. Triumph Specialty Co., *802.
Ship propulsion, electric (D.), 471, 992.
Shipbuilding:
——Electric welding in, 683, *993, (D.), 1220.
——Expedited by electric service. By David Elwell, *42.
——Hog Island shipyard, electricity at, 994, 1267.
——Motor drive for. By David Elwell, *506; comment, 498.
——Rivetless ship a possibility (D.), 1046.
——Temporary lighting, standardization of. By William G. Hexamer, *96; comment, 83.
Shoemaking, electrical. G. Basil Barkam (D.), 886.
Short circuits, force erected by. By Geo. W. Teffeau, 362.
Short circuit phenomena and flux distribution of salient pole alternators. By N. S. Diamant (D.), 1219.
Signal Corps, opening for radio communication work, 634.
Signal officers' training course. By Major J. Andrew White (D.), 784.
Signaling systems:
——From central stations to customers. By Pierre Trichard (D.), 1381.
——Keadby (England) railway and bridge signaling and interlocking of. By James Benjamin Ball (D.), 835.
——Signaling and control on railways. By C. M. Jacobs (D.), 367.
——Synchronous signaling at sea (D.), 1329.
——Wireless signal lamp for war work, 1031.
Signs and decorative lighting:
——Art-glass sign. Flashlight Sign Works, 1115.
——Flasher, magnetic thermo type. M. C. Ryan, *1347.
——"Lightless" order for New York State, *58.
——War and food-saving signs, New York, *529.
Silver-buffing machine. Ernest Koppen, *126.
Silver sulphide electrical properties of. By George W. Vinal (D.), 159.
Slip rings, high-speed, patent, *95.
Smoke stacks, expansion joint for. By T. W. Reynolds, *570.
Society for Electrical Development:
——Annual meeting, 1048.
——Co-ordinating data on retail costs, 530.
Sockets. (See Plugs and receptacles.)
Soldering cost reduced, 1090.
Soldering iron, electric with insulated handle. Clemens Electrical Corp., *698.
South African electric supply systems, standardization. By John Roberts (D.), 731.
South Dakota Electric Power Association, annual convention, 1104.
Southern California Edison Co., meeting war-time conditions, 874.
Southwestern Electrical and Gas Association, war convention, 894.
Sparrow, John Porterfield, tribute, 740.
Speed reduction gear. Poole Engineering & Machine Co., *1011, 1115.
Spray-head for cooling tower, Yarnall-Waring Co., *906.
Standard cells, substitutes for, 412.
Staten Island Shipbuilding Company, power requirements and electrical distributing systems. By David Elwell, *42.
Statistics:
——Central station business, October, 1917, *26; November, *254; December, *463; January, *725; February, *932; March, *1139.
——Electrical progress, 1917. By T. C. Martin, 9.
Steel:
——Carbon, hardening equipment for (D.), 887.
——Chronium steel for magnets (D.), 264.
Steel fusion welds (D.), 1147.
Stellite as a substitute for platinum. By E. Haynes (D.), 7.
Stokers. (See Boilers.)
Stoves, electric:
——Cost of operation of club grill for one year, 519.
——Disk stove chafer, Landers, Frary & Clark, *959.
——Double range. Simplex Electric Heating Co., 1115.
——Efficiency of. By R. G. Kloeffler, I, *357; comment, 342; II, *408.
——Four-heat disk type. Landers, Frary & Clark, *595.
——Grill with rust-proof pan. Landers, Frary & Clark, *1062.
——Ranges in workmen's houses, 1092.
——Rutenber Electric Co., *698.
——Toaster, automatic. Rutenber Electric Co., 1115.
——Waffle iron. Landers, Frary & Clark, *595.
Street Lighting. (See Lighting, street.)
Submarine cables and ocean beds (D.), 834.
Substation. (See also Central stations.)
——Automatic, advantages of. By Chas. F. Lloyd (D.), 886; by H. E. Davis (D.), 886; by R. J. Wensley (D.), 989.
——Buenos Aires, Tres Sargentos station (D.), 940.
——Designing and operating for maximum efficiency (D.) 989.
——Outdoor type:
At Madera, Calif. By L. J. Moore, *718; comment, 707.
Ready-made. Delta-Star Electric Co., *1062.
——Portable, for serving emergency loads, *726.
——Rotary converters, operation of. By W. R. Bowker (D.), 886.
——Semi-outdoor type, estimated total cost, 621.
——Women as operators, 1262.
Sweden:
——Hydroelectric development (D.), 834.
——Radio station at Karlsborg (D.), 887.
Swindling scheme, electrical, exposure of. By Carl Hering, *524.
Switchboard:
——Dead-front panels, G. E. Co., *1346.
——Fuses and distribution boxes, arrangement of. By H. Burt Foote, *206.
——Ironclad types (D.), 263.
——Panelboard, simplified by mounting relays on back, *465.
——Safe design and operation. By M. M. Samuels and F. N. Bechoff, *656; comment, 654, *1075; comment, 1071.
——Safety, unit-type. Kranz Mfg. Co., *1083.
——Terminal points, weak and strong types. By Ferdinand Bechoff, *257.
Switches: (See also Oil circuit breakers, Control, and Circuit breakers.)
——Automatic knife type. Electrical Engineers' Company, *490.
——Automatic starting switch for squirrel-cage motors. Cutler-Hammer Mfg. Co., *595.
——Automatic switching equipment. By R. J. Wensley (D.), 886.
——Battery switch. Fahnestock Electric Co., 646.
——Circuit breaker is adapted to the current capacity and fuse of much greater capacity used for short circuit dangers By E. C. Parham, 415.
——Combination switch and receptacle plate. Peerless Light Co., 1011.
——Combined fuse and disconnecting switch. G. E. Co., *907.
——Cover for push-button switches. Crouse-Hinds Co., *1238.
——Cut-out type with interchangeable knock-out. Palmer Electric & Mfg. Co., *854.
——Disconnecting bus-type. Delta-Star Electric Co., *1399.
——Duplex switch. Bryant Electric Co., *542.
——Externally operated. Trumbull Electric Mfg. Co., *179.
——Heavy-duty switches for loom motors mounted in pairs, *517.
——Inclosed safety type. California Electric Construction Co., 1399.
——Inclosed type. Leonard-Bundy Electric Co., 230.
——Lighting switch for motor cars. Industrial Controller Co., *75.
——Master switch. Igranic Electric Co., Ltd., *283, *386, *438.
——Motor-starting switches for low-voltage and over-load protection. Wells-Morris Mfg. Co., *439.
——Oil type, tests on (D.), 1220.
——Outdoor switching apparatus. By H. G. MacDonald (D.), 834.
——Push-button switch with automatic time regulation. Samuel M. Esler, *803.
——Remote-control air-break switch, *622.
——Remote-control type for street lighting, *309.
——Rotary switch for a fire-alarm siren. Reynolds Electric Co., *179.
——Safety type:
Autoclock. Krantz Mfg. Co., *698.
Metropolitan Electric Mfg. Co., 595.
Meyers Electric Safety Switch Co., *1115.
Steel-enclosed. Square D Co., *1011.
——Switch-gear standardization. By C. C. Garrard (D.), 575; (D.), 732; (D.), 1278.
——Terminal points, weak and strong types. By Ferdinand Bechoff, *256.
——Time switch. Hartford Time Switch Co., 386.
——Toggle surface type. Harvey Hubbell, Inc., *179.
——Water-tight switch box. Barlow Electrical Specialties Co., *542.
——Z Y condulets. Crouse-Hinds Co., *491.
Switching apparatus, outdoor. By H. G. MacDonald (D.), 940.
Switzerland:
——Coire-Arosa Railway (D.), 469.
——Heating appliances, extensive use of (D.), 106.
——Industrial plants, electrical heating of. By F. Rutgers (D.), 106.
——Loetschberg Railway (D.), 1380.
——Water-power law. By G. Tochon (D.), 263.
Synchroscopes, checking for use in phasing out. By C. Otto von Dannenberg, *205.

*Indicates illustrated articles.

T

Tacoma (Wash.) municipal power plant, damage done by flood, 326.
Technical engineer, need for conservation of, 1222.
Telegraphy:
——In the first year of war. By John V. L. Hogan, 352.
——Postal company's generator wiring arrangement (D.), 940.
——Progress in United States (D.), 628.
——Simultaneous telegraph and telephone communication. By William Maver, Jr. (D.), 941.
